

Data Migration

Reduce Time-to-implement for Maximum Productivity

CANBERRA reduces system implementation time to maximize productivity by transferring your current calibration, analysis and QA information from the existing system to the new. Additionally, previous data files can be archived in a retrievable manner and current demographic information can be transferred to your new Apex-InVivo system.

SERVICES INCLUDE

Offer data migration for Apex-InVivo Data Migration.

Migration of:

- > Existing energy calibration file(s) into Apex-InVivo.
- > Existing efficiency calibration file(s) into Apex-InVivo.
- > Existing library, certificate and ASF files into Apex-InVivo.
- > ABACOS-2000 QA files into Apex-InVivo.
- > ABACOS-2000 Personnel data from ABACOS-2000 systems into Apex-InVivo.
- > Migrate or archive to make available existing Personnel Count Data for review.
